

REMARKS

Claims 61 and 62 are currently pending in the application.

A Notice of Allowance in the above-referenced patent application was mailed on September 20, 2004. Upon reviewing the application in response to the Notice of Allowance, Applicants discovered minor errors associated with claims 61 and 62. Specifically, in the preamble of each of claims 61 and 62, a frequency of 400 Hz is incorrectly associated with a period of "2.5 ins." Applicants amend claims 61 and 62 to correctly identify this period as "2.5 milliseconds". In the last line of claim 61, the term "n-th symbol" is incorrectly presented as "n-th signal". Applicants amend claim 61 to replace this term with "n-th symbol". Applicants believe that these errors were introduced as transcription errors in Applicants' Response of July 30, 2004.

Applicants respectfully request entry of the present Amendment to correct these errors. Applicants respectfully submit that the Amendment does not impact the patentability of claims 61 and 62 (including, in particular, the reasons for allowability cited by the Examiner in the Office Action of April 30, 2004), and does not require substantial work to be performed on the part of the U.S. Patent & Trademark Office.

Any fee due with this paper may be charged on Deposit Account 50-1290.

Respectfully submitted,

Thomas J. Bean
